PEMBINA NEWS ADVERTISER

Vol. 7 No. 9 March 7, 1968 A. Playford, Publisher Box 130, Drayton Valley.

A.A.R.N. Presents Painting B.P.O. ELKS GUN CLUB

Mrs Dorothy Jahke, Matron at Drayton Valley Municipal Hospital. Mr. Allan Falconer, the young artist who painted the picture that is the A.A.R.N. presented to the hospital. Mrs. Clara Fisher, A.A.R.N. member, Mrs. Olga McIvor, A.A.R.N. member, Mrs. Marion Palmer, A.A.R.N. member and Mrs. Naomi Schneider, A.A.R.N. member.

Mr. Allan Falconer came to Drayton Valley on Saturday, February 24, 1968 to present to the local Chapter of the A.A.R.N. a painting purchased in memory of Mrs. Joan Amadi to be hung in the Hospital corridor.

A tribute to Mrs. Joan Amadi was written by Mrs. Brooks for the Pembina News Advertiser and we would like to reprint it at this time.

"With the tragic passing of Joan Amadi, this community has lost a gifted personality who will be sorely missed by all who worked with her in the operating room and in the Hospital.

In addition, she had a charm of manner and a sense of humor which was a delight to all who worked with her. In a word she was the ideal of all that a nurse should be, fulfilling to an overflowing measure, the Florence Nightingale spirit and tradition.

FIRE DESTROYS HOME

An early morning fire completely destroyed the home of Mr. and Mrs. Coleman Pierce in Dodson Trailer Court on Wednesday morning last. The fire is thought to have started in the oil heater and spread rapidly to the rest of the dwelling. Fortunately Mrs. Pierce, with their three children, one a one-week old baby, were in Edmonton at the time of the fire. Mr. Pierce suffered burns on the face and hands and was treated in Drayton Valley Hospital.

Staying in the Pierce home at the time of the fire was young Ben Polivoda, whose house had burned the day before. Also in Dodson Trailer Court, Ben was working on a rig, and was on day shift, his brother happened to be working on the same rig, graveyard shift. At the time the fire broke out in the Pierce home.

The fire broke out on one of our coldest nights. The thermometer registered a chilling 20 degrees below zero when the fire first blew at 6 o'clock in the morning. In spite of the chill the Drayton Valley Volunteer Fire Department responded very quickly to the alarm.

Thus far, Drayton Valley has not had either as many fires as in the past, and we are hoping to keep it that way.

We have an extremely efficient and speedy fire department and are glad to know they are available whenever they are needed, but we hope that their services will not be needed too much in the future.

Rotary "Adventure In Citizenship" Winner

Miss Sheila Campbell, the daughter of Mr. and Mrs. Allan Campbell, won the Rotary sponsored trip to Ottawa with her prize winning essay on "The Importance of Education to Canadian Youth."

Miss Campbell is a twelfth grade student in Drayton Valley High School. She will be eighteen years old in the middle of this month. She was born in Lethbridge where her family formerly resided.

Her father, Allan Campbell is employed with Mobil Oil as materials supervisor.

Miss Campbell's essay appears on this page, below.

"THE IMPORTANCE OF EDUCATION TO CANADIAN YOUTH"

Education is of vital necessity to Canadian youth. It is not only the foundation on which our future generations will be benefited, but it is also the basis of our present day society. Education enables a person to enter into community affairs and to apply his knowledge in daily life.

The educated person is open-minded. He will never laugh at new ideas and before he makes a decision, he will consider carefully all the evidence surrounding the question. His curiosity and his eagerness to learn will lead to new inventions and he will never be satisfied until he has been given a chance to demonstrate his abilities. An educated person is therefore always willing to learn more and more.

COOKING MAGIC

Mrs. Rose Godes, S.N.H.
Home Service Director
Tried Recipes and Meal Planning Ideas Prepared for Pembina News Advertiser Reader by the Home Service Department of Northwestern Utilities, Limited.

To add the final touch to lunch, prepare for soup and salad, try one of these different baking powder biscuits.

SALAD BISCUITS

2 1/2 cups sifted all-purpose flour
4 tsp. baking powder
1 tsp. salt
6 tbsp. shortening
1 can condensed cream of celery soup, or cream of mushroom, or cream of chicken soup.

Sift together dry ingredients. Cut in shortening with pastry blender or 2 knives until well mixed. Add soup, stirring quickly until a soft, but not sticky dough is formed. Turn out on a lightly floured board and knead gently to shape into smooth ball. Roll out to 1/4 inch thick and cut with floured biscuit cutter. Place on lightly greased pan baking sheet. Bake about 15 minutes in hot oven (450°F.).

NOTE: 2 1/2 cups of packaged biscuit mix may be substituted for the flour, baking powder, salt and shortening in this recipe.

SCUR MILK BISCUITS

2 cups sifted all-purpose flour
2 tsp. baking powder
1 tsp. soda
3/4 tsp. salt
4 tbsp. shortening
2/3 cup 3/4 cup sour milk

Sift flour, measure, sift twice with baking powder, soda and salt. Cut in shortening quickly until crumbly. Add sour milk, mixing lightly to a smooth, soft dough. Turn out on a slightly floured board and pat or roll to 1/4 inch thick. Cut with a floured cutter. Bake on ungreased baking sheet at 450°F. in your gas oven for 15 minutes (when using sour cream, use 1 cup of shortening).

CHEESE BISCUITS

3 cups flour
2 tsp. baking powder
1/4 tsp. salt
1 cup grated cheese
2 tbsp. shortening
2/4 cup milk

Sift dry ingredients together; add grated cheese, cut in shortening; add milk. Stir only until all the flour is dampened. Place on lightly floured board. Roll or pat to 1/4 inch thickness and cut with biscuit cutter. Place on ungreased baking sheet and bake in hot gas oven (475°F.) for 10 to 12 minutes. Brush biscuits with milk, melted butter or margarine just as they are removed from the oven. Makes 34 biscuits.

ORANGE-THIA BISCUITS

3 cups flour
4 tsp. baking powder
1/8 cup milk

1/4 tsp. salt
3 tbsp. butter
Mix dough by same method as for cheese biscuits. Place small amounts of dough in muffin tins, add orange syrup, then more dough. Bake in gas oven of 425°F.

ORANGE SYRUP

3 tbsp. butter
1 cup, orange juice
1 cup, orange rind
1 cup sugar
Cream butter and sugar. Mix in orange juice and rind.

GREEN ACRES

by Bert C. Lewis
Dentist & Agriculturalist.
An increase in Alberta's cereal crop acreages in 1933 is anticipated by C. C. Hirstvold, Supervisor of the Department of Agriculture's Crop Improvement Service. The easing of the wheat surplus situation, brought about by increased exports and a short crop last year, will tend to encourage farmers to increase their wheat acreages.

The 1931 drought resulted in a small crop of cereals and consequently the supply of feed grains will reach a record low before the next crop is harvested. All of this is having the effect of increasing delivery quotas, or in many instances, removing them altogether.

The farmer, being thus relieved of marketing problems to a great extent, will be able to exercise greater flexibility in his choice of crops to grow. Since the western farmer has traditionally been a grain producer, there will undoubtedly be a return back to grain at the expense of such crops as alfalfa, specialty crops and forage. This will be accompanied by a reduction in the number of acres devoted to summer fallow.

While there is an evident need to increase production of all grains, except flax and rye, there are some major differences in the supply picture in the effect of wheat, oats and barley. By the end of the current crop year wheat supplies will be at their lowest since 1925. The anticipated overcrop is expected to be around 300 million bushels. This is considered an optimum carryover and anything less could constitute a supply problem in meeting the demands of our customers. Nevertheless, this carryover plus production in 1932, even if it only equals last year's short crop, will provide a supply of approximately 550 million bushels, which after meeting our domestic and export needs, would leave our supply shorter than desirable but not necessarily critical.

The supply picture in feed grains is much more critical. Supplies of barley are adequate to meet domestic requirements plus limited exports only. It is likely that we will enter the 1933-34 crop year with no supply of any consequence. The oat supply is even poorer. We do not have sufficient stocks to take care of domestic requirements for the current year and the Canadian Wheat Board has already issued import permits covering substantial quantities of oats from the U.S.

The livestock feeding industry is an important outlet for grain, particularly oats and barley. It is an industry whose future appears stable and, in the long run, view, will most certainly be expanded. Mr. Hirstvold stresses that it is important to the grain producer's future that this market be adequately supplied. Oats and barley acreages need to be increased substantially to take care of our domestic requirements and build up a modest working carryover. While exports markets for Canadian oats have never been too reliable, we do have a fairly steady export demand for barley, chiefly to the U.S. and Britain and more recently to mainland China.

From an analysis of the Dominion Bureau of Statistics' estimates it is apparent that Canada will have to increase oat acreage by approximately 13 per cent and barley by 27 per cent to meet normal demands during the next crop year. This is based on the assumption that yields in 1932 will equal the recent two-year average. Applying this to Alberta, it would mean increasing oat acreage by approximately 50 thousand acres and barley by 940 thousand acres. Such a large shift in the cropping pattern in one year seems highly improbable, if not impossible. Mr. Hirstvold finishes up by saying:

(Cont. on page 6, Col. 1.)

S'NOWTIME LIKE THE PRESENT FOR ACTION-PACKED MOVIES

You're taking snapshots, but never a home movie?

Remember that you don't have to be a Hollywood director to make interesting movies. Far from it. And remember, too, that sometimes movies are just as much fun to make — as films made during spring and summer. Snowball fights, bloopers, rides, parties, ice skating, hockey — these are just a few of the exciting possibilities.

You'll get more fun with winter movies by looking at them at all times. Any unexpected will be greatly appreciated when the film is projected. Planning — that is, swinging the camera horizontally to cover an extended view — should be kept in a planform. But when you go to give very slowly from the waist to keep blurred backgrounds to a minimum.

Here's an interesting trick: use snow to fill your winter movie. It's a simple matter to get a lot of snow to fill in the snow, and then shoot. For best effect, well until the sun sinks low and casts long shadows.

If you are still to enjoy the fun of home movies why not make 1968 the year for your doing.

"kiss" can be a shot of four to 10 seconds. Shoot in sequence. Instead of just one picture of a scene, take three or more. Use a long-shot to establish the scene's locale and its characters — for example, a boy and girl on a toboggan, stop a snow-covered hill. Follow-up with a medium shot that carries you into the scene. The third shot, a close-up, picks up a focal point of interest — for example, the girl's eager expression.

Strip your camera with both hands and keep it steady at all times. Any unexpected will be greatly appreciated when the film is projected. Planning — that is, swinging the camera horizontally to cover an extended view — should be kept in a planform. But when you go to give very slowly from the waist to keep blurred backgrounds to a minimum.

Here's an interesting trick: use snow to fill your winter movie. It's a simple matter to get a lot of snow to fill in the snow, and then shoot. For best effect, well until the sun sinks low and casts long shadows.

If you are still to enjoy the fun of home movies why not make 1968 the year for your doing.

SEVENTH ANNUAL ICE CARNIVAL

Erica Mallen, sponsored by Drayton Valley Merchants.

Carol Parmenter, sponsored by the Producing Companies.

Joanne Wilson, sponsored by Pipelin, Service and Supply Companies.

Off again to a flying start is the Drayton Valley Ice Carnival this year marks its seventh anniversary. Once again the big snow show will be staged indoors in the large curling rink. Cutting will be over at that time and this ice will be made ready for the big show at the close of the curling season.

Date set for the performance is Saturday, April 13th.

QUEENS.

As previously the Ice Carnival will be staged by the presence of three young ladies. The pictures showing the selection for this year's Queen Candidates are presented on this page.

In the upper left is Miss Erica Mallen, high school student, sponsored by Drayton Valley Merchants.

Next picture down is Miss Carol Parmenter, who is employed with local OIL. Carol is sponsored by the Producing Companies.

And last, but certainly not least, is Miss Joanne Wilson, employed with Hudson's Bay, Joanne is sponsored by the Pipe Line Service and Supply Companies.

Tickets are on sale, and the next issue of this paper will give the place where tickets for the girl of your choice may be obtained.

Mobil Spends 4 Million On Automation

Drayton Valley, Alberta — Automation is being introduced to Canada's largest oil field.

Later this year a new automatic system will replace manual control of production from wells in part of Pembina, an oil field of some 750 square miles located about 70 miles southwest of Edmonton.

Designed by Mobil Oil of Canada engineers, the system will be operated by Mobil as an integrated production unit capable of handling 50,000 barrels of "clean" oil daily from 480 wells.

It will be the largest automatic oil field production system of its kind in the world.

From well-head to pipeline, through intermediate stages of testing and treating, the flow from each well will be regulated automatically. Production records also will be made automatically.

Conversion from conventional manual methods has been in progress nearly two years. When completed, some \$4 million will have been spent on the project by the 33 companies who own the wells connected to the system.

Credit oil from the wells flow via a pipeline gathering system through one of 94 control and measurement stations; the project extended throughout the project.

The automatic system is self-regulating to the extent of giving an alarm signal if conditions get beyond proper limits and to shutting off production from any well if that becomes necessary. Performance of the system will be monitored from a central location.

Previously, production throughout the 70 square mile area was gathered at 50 tank battery locations. Each location included equipment for removal of gas, and oil storage and pipeline shipping facilities. Movement of the oil was controlled manually.

The changeover to automatic production came with the use of water to boost the amount of oil being recovered. This included

Legion Presents Cheque To D.V. Band

Drayton Valley Legion presented a cheque to the Drayton Valley Band to be applied on the purchase of new instruments.

In the picture Legion Secretary G. W. Donovan presents Arnold Lloyd, member of the Band, with the cheque, while Legion President M. McCullagh looks on.

votes the injection of water into the ground to force the oil out, but results in water being produced with the oil.

Instead of installing facilities at 60 locations for removing water from the oil, it was cheaper to scrap the existing facilities, reduce the number of gathering points to 34, and install automatic equipment.

The changeover is now more than two-thirds complete as production of oil continues during the conversion.

Voting Results

Drayton Valley voters and ratepayers went to the polls last Wednesday to vote on three issues. Only one carried with a clear majority.

The voters voted 285 for and 153 against spending the Municipal Grant for a swimming

(Cont. on page 5, Col. 3)

Men's Open Bonspiel

Drayton Valley Fifth Annual Men's Bonspiel was completed Sunday evening March 3rd, and once more proved to be a huge success. A total of 40 teams entered the competition. The prize list totalled \$1,800, for the six events.

On Friday evening, March 5th, a banquet was held for some 200 guests, with the Anglian W. A. women again assisting themselves with a supper.

The final results of the different events are as follows:

Grand Aggregate — Edmondson Motors.

Pembina Pipe Trophy — 1. Edmondson Motors, 2. Woodland, 3. Sherbrook, 4. McEwen.

(Cont. on page 2, Col. 3)

Winners of the Matlock Trophy in the Fifth Event in the Drayton Valley Men's Open Bonspiel. W. Ward, Ship, B. Follock, Third, W. Chaney, Second, and B. Rued, Lead. Don Matlock is making presentation of the trophy.

Education Week

Education Week was held in Drayton Valley schools last week. Thanks for the week was "Account on Excellence" and from the high quality of the art work and the ways which came out of the Elementary schools. We would like to say that the pupils had followed the theme very closely.

Contents were conducted at the Drayton Valley school level by Pipelin, Service and Supply Companies.

The art work has been displayed at the Bay for the past week. Winners in all class were:

Zane Reithart, Grade 1. Combs, Dufrock, Grade 2. Allen Gibson, Grade 3. M. G. Crosby, Grade 4. B. Rued, Grade 5. Grade 6 and Jo Deo Samsonson, Grade 6.

(Cont. on page 16, Col. 1)
